Our Mission: To protect and improve the health and environment of all Kansans.

National Public Health Week

April 2 – 8, 2018

Ideas:

participate through social media,
write a letter to the editor,
present an award honoring a public health
advocate,
have a guest lecturer,
create an event,
attend a conference, learn something new,
support future professionals, and
... on and on there is a lot you can do.

Our Mission: To protect and improve the health and environment of all Kansans.

Webinar

Training Opportunity

- The 2018 Kansas Infectious Disease Symposium will be held May 10-11, 2018.
 - Pre-conference surveillance training to be hosted by the Kansas Syndromic Surveillance Program which will focus on syndromic surveillance tools and best practices.

Update on Outbreaks

Salmonella:

- Outbreak associated with frozen waffles. We still have two cases and are attempting to obtain purchase information for one of the cases to assist with traceback of the potential implicated item.
- Two cases in the multistate outbreak of Salmonella linked to kratom powder. This case has been interviewed and routinely consumes kratom powder. We are still working with FDA and CDC on this outbreak.

Update on Outbreaks

Mosquito surveillance:

- We are scheduling trainings for mosquito surveillance for Sedgwick, Shawnee and Reno Counties. Our mosquito surveillance will begin in May.
- We are also working with CDC to begin active surveillance for Heartland and Bourbon virus this spring. We have two hospitals participating this year, University of Kansas Medical Center and Via Christi in Pittsburg.

Update on Outbreaks

Measles:

- On March 8, 2018, KDHE and the Johnson County Department of Health and Environment were notified of a case of measles in a daycare in Johnson County.
- Eleven cases have now been identified – nine Johnson County residents associated with the daycare, one Linn County resident associated with the daycare and one Miami County resident not associated with the daycare.

Update on Outbreaks

Measles:

- To date, public health has been able to identify where and when each case became infected
- Ages range from 0 to 53 years; all but two persons are unvaccinated.
- Exposed contacts from closed settings are being identified and notified.

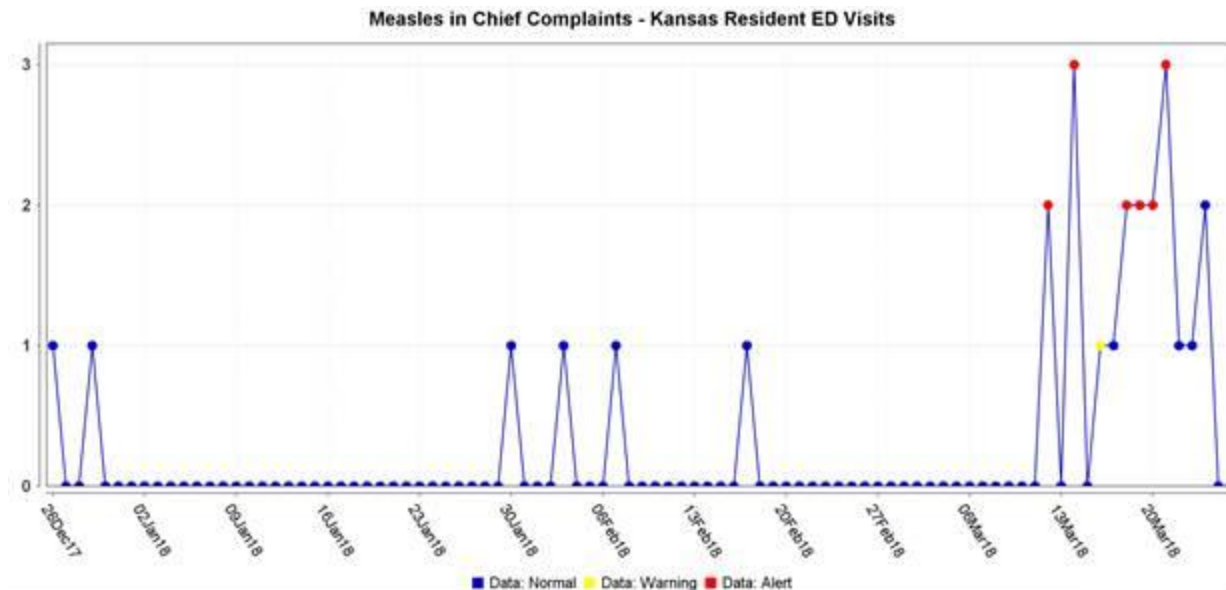

Update on Outbreaks

Measles:

- Cases visited public places in Johnson, Miami and Linn Counties in Kansas while infectious dating back to March 2, 2018. One case did visit tourist attractions in and around St. Louis, Missouri, from March 11 to March 14, 2018.

Syndromic Surveillance

The Kansas Syndromic Surveillance Program assisted infectious disease epidemiologists to identify possible cases using ED data to search for mentions of “Measles” in patient Chief Complaints.

Our Mission: To protect and improve the health and environment of all Kansans.

Syndromic Surveillance

Continued:

- 13 local health departments are currently participating in KSSP. A new field has been added to syndromic data to report on distance from the patient residents to the emergency department used. This will help provide insight for evaluation of severe weather outbreaks, travel events, and mass gathering events.

Our Mission: To protect and improve the health and environment of all Kansans.

- New Updated indicators for Kansas Health Matters are online. The updated items are:
 - Percentage of Screened 3-12 Grade Students w No Dental Sealants Copy
 - Percentage of Screened K-12 Grade Students w Obvious Dental Decay Copy
 - Rate of Violent Crime per 1,000 population
 - Ratio of Children to Adults
 - Ratio of Elderly Persons and Children to Adults
 - Ratio of Elderly Persons to Adults
 - Staffed Hospital Bed Ratio
 - Sexually Transmitted Diseases

Preliminary Birth Report will be issued in Mid April.

Our Mission: To protect and improve the health and environment of all Kansans.

PRAMS

- The first year of PRAMS Surveys is nearing completion.
- Over 500 surveys have been completed by phone and mail.
- The weighted response rate has been 65.1%.

Our Mission: To protect and improve the health and environment of all Kansans.

Hospital Data

- KDHE has a new agreement with KS Hospital Association to obtain in-patient and emergency department data on a quarterly basis. This will enable creation of a KIC query tool and indicators on new measures for Kansas Health Matters.
